Ringwood Town Council

**Planning Application 21/10042 – land north of Hightown Road** – for up to 400 dwellings and 3 hectares of employment (Class E and B2), access, open space, landscaping, alternative natural recreational greenspace (ANRG) and drainage attenuation (Outline Application with details only of Access)

**Initial observation: Refusal (4)** for the reasons highlighted at the Extraordinary Meeting of Planning, Town & Environment Committee on 20 April 2021 and summarised below.

This is an initial observation and there will be further consideration of the application as new information becomes available.

**The Town Council will continue to engage with NFDC officers in order to get the best outcome for Ringwood.**

1 - Overdevelopment / out of character

The proposed development of 400 houses with commercial areas and minimal greenspace is not in accordance with the definition of “well designed new development” which responds positively to the features of the site itself and the surrounding context beyond the site boundary, as outlined in the National Design Guide.

The proposed density is much higher than surrounding residential areas.

The quantum of development is significantly higher than “at least 270” stated in Policy SS14. There is concern that all assessments carried out by statutory consultees in preparation for the Local Plan will be compromised.

The site is on the edge of the New Forest National Park and the NFNPA’s concern about the quantum of development and amount of greenspace provision is shared.

2 - Adverse impact on environment

Concern for species not identified in the applicant’s Wildlife and Ecological Assessment (e.g. buzzards, pine martins, owls and jays), and for loss of ground nesting species due to the extensive network of footpath proposed.

Consideration should be given to extending hedging at the east and west side of the north border hedge, prior to building starting, to allow species to easily migrate away from the roundabout area. Hedge and tree removal work should be carried out outside of the nesting season. Installation of bat boxes in tree locations adjacent to the site to facilitate migration of Bechstein and other bats before any development takes place.

Mitigation in relation to phosphates to be agreed before commencement of development.

Concerns with air and noise pollution and climate change, with the need to drive down carbon emissions. It is hoped these issues will be addressed in the reserved matters application and the Town Council can be involved in any related discussions.

---

### 3 - Insufficient community infrastructure

Concern over pressure on all existing schools, which are already at or near capacity. This must be considered in conjunction with proposed development of SS13 land at Moortown Lane.

Lack of provision of medical facilities (doctors, dentists) and community facilities (there is no provision for a community hub as outlined in the Policy SS14).

Existing road network, and walking and cycling infrastructure, is not adequate to deal with the significant increase in traffic (vehicular, cyclists and pedestrians) that will be generated by this development (and the proposed development of SS13).

### 4 - Road safety / poor transport options

As a consequence of the inadequacy of the road network in the vicinity of the proposed development and the increase in traffic volume, safety issues arise for pedestrians, cyclists and equestrians – there must be safe routes for all road users.

Concern that data used for the applicant's Transport Assessment is either out of date or collected during the pandemic and should be reviewed, also taking into consideration the recent closure of the West Street access to the A31.

The applicant's Residential Travel Plan is insufficient and lacks detail. It should address residents' need for access to a full range of facilities and activities; reduce the traffic generated by the development; encourage good design principles and support the local community. The Town Council will consider this further at its Planning, Town & Environment Committee on 7 May 2021.

Access to the town centre and other shopping areas, and the impact on car parking, needs further consideration.

Concern over air quality and noise pollution in relation to additional traffic generated by the development, and proximity to the A31.

### 5 - Flood / waste water concerns

Winter flooding is already an issue in the Hightown area adjacent to the proposed development site and there is concern that the development might add to this. Flood mitigation measures must be future proofed, with the developer being held to account if any measures prove inadequate.

It is understood that the sewage treatment works are already over capacity. Further information is required from NFDC/Wessex Water.

### 6 - Proximity to New Forest National Park

Concerns in respect of visual intrusion and light pollution, and the impact of construction on the NFNP.

**18/11648 - Development of 20 dwellings comprised of semi-detached houses; terraces; 1 block of flats, bin & cycle store; detached garages; public open space, landscaping, internal access arrangement and ancillary infrastructure.**

**NFDC new owners of the employment site:**

**20/11208 FULL – COU of buildings B, C, D, E from B1 (granted under 17/11358) to use E and B8**

**Developer: Lindens Homes (now part of Vistry)**

The care home has commenced development. The foundations have been constructed and the developer is currently constructing the ground floor walls.

I now have a direct contact at FirstPort Property Management. I have been trying to get some broken Aco drainage edging one of their roads to be repaired, as it was dangerous. This work has now been carried out.

FirstPort, as the land owner for some of the affordable housing on site, is liable for the landscaping maintenance and remedial planting that is required as part of the planning permission. This work is already being carried out. They also know that I will be making an annual site inspection (minimum) to make sure that the land is kept to a satisfactory standard. This is part of the new monitoring procedure we now have.

Our contact at Vistry has been off on medical leave for six weeks. Due to the nature and detail of the snags required to be addressed, it has been difficult for Vistry to progress this recently. Our contact has apologised to us, and to people reading this report, for the delay this has caused. I have spoken to the contact this week and they have already moved this higher within the organisation to try to get some movement on the more tricky matters to resolve.

The allotments situation is making progress. Ringwood Town Council have received a clear Land Registry Report on Title from their solicitors. They will be taking this report to council in the near future, hopefully enabling the transfer process to continue.

The Developer is still responsible for the maintenance of the development currently, alongside the housing association.

Monitoring of this site by the Site Monitoring Officer or the Open Spaces Officer will continue in the short and medium term.
